

## **Swivel Announces New US Managed Service Partnership Agreement**

1<sup>st</sup> February 2010, Wetherby, UK – Swivel Secure, the world's pioneer of tokenless two-factor authentication solutions, has announced a strategic technology and marketing partnership with Philadelphia PA based PCN Inc. a top-20 Philadelphia IT Services Company and a finalist in the Philly 100 Fastest Growing Privately Held Philadelphia Area Firms.

Under the terms of the agreement PCN will incorporate Swivel's award-winning PINsafe™ technology into its end-to-end multifactor authentication Managed Services Solution. PCN's managed services give customers, employees, partners and other authorized users the ability to remotely access critical enterprise applications and resources, resulting in increased security, productivity, and disaster recovery capability.

PCN, founded in 1988, provides a broad range of IT consulting and business process outsourcing services to government agencies, private customers, and commercial partners in North America, with clients and prime contractor partner organisations in the Commercial, Transportation, Defence, and Government sectors to develop, deliver, and improve technology solutions in complex multi-vendor environments.

Fraser Thomas, Business Development Director for North America at Swivel Secure said "Cloud-computing and the managed services sectors are growing rapidly, particularly in the US. With no tokens to deploy PINsafe is highly scalable and extremely simple to provision, whether that is for 1 or 10,000 users, making it an ideal platform for the service provider environment. PCN is a rapidly growing company with an excellent reputation and client base in the private and Government sectors, areas where we already have a strong foothold. I am looking forward to developing a strong working relationship in the coming months and years."

### **About Swivel Secure**

[www.swivelsecure.com](http://www.swivelsecure.com)

Swivel is a member of the Marr T&T Group of companies. Formed in 2000 the company is a leading developer of multi-factor authentication solutions based in the UK and with an extensive distribution and reseller network covering North America, EMEA and Asia PAC. Now in its 10<sup>th</sup> year the company's award-winning PINsafe™ technology was the first commercially available product to use mobile phone and PDA technology in place of physical tokens to authenticate remote network users and is now widely in use in every country in the world.
