

**SWIVEL SECURE
TOKEN-LESS AUTHENTICATION SOLUTIONS
EXHIBITING AT
INFOSECURITY EUROPE 2009
28th – 30th April 2009**

Visit us on Stand No. E46

Swivel Secure is exhibiting at Infosecurity Europe 2009, the No.1 industry event highlighting current and emerging technologies being held from the 28th – 30th April at Earl's Court, London.

Swivel Secure is taking part in this leading industry event to showcase its token-less, multi-factor authentication solution called PINsafe, which is revolutionising the way companies are able to provide secure, remote IT access to its personnel.

The Swivel PINsafe solution provides VPN authentication for remote access to corporate or website applications using mobile devices and web browsers. PINsafe is designed to combat threats ranging from skimming, phishing and spyware, to shoulder surfing, key logging and social engineering. Its unique combination of registered PINs and randomly generated security strings delivered simply to the user makes it the safest, easiest and most reliable and cost-effective authentication solution available.

Sarah McNicol, Channel Director, UK & Ireland of Swivel Secure commented, "Businesses today require mobile solutions for their employees which is fast and easily accessible but, most importantly, secure to use wherever and whenever key personnel are located around the World. Based on patented technology Swivel's PINsafe solutions are setting a new benchmark for authentication solutions and is successfully providing peace of mind to organisations globally, whatever their size and industry."

Swivel Secure's distributors and resellers support a global reach for SME to blue chip organisations and current clients include leading financial, retail, engineering and legal companies, as well as Government and health organisations.

Testimonials:

"We needed to accommodate a broad range of users in terms of their IT capability and Swivel Secure's token-less system really fitted the bill, making it an easy transition to make"

International Chartered Accountant's Rawlinson & Hunter

“PINsafe is just an easier option all round, for both the employee and the IT department, as the agents don’t need to remember to carry a token with them. We are so impressed with the PINsafe system we will probably increase its use within the the Tax and Customs Departments over time.”

Portuguese Ministry of Finance’s IT Department, D.G.I.T.A

“Swivel Secure offers a unique solution with true security and financial benefits – it reduces costs and risk and increases efficiency and productivity. A recent audit has shown that Swivel Secure’s token-less solution delivers typical costs savings of 40% on the token-based option.”

East London NHS Foundation Trust

“The provision process is incredibly simple and Swivel Secure’s PINsafe token-less solution is so much better than using the security tokens. We are seeing a real transformation in our work force and the way our business is now operating.”

Global pharmaceutical services company, Quintiles
